Career Summary

PMP certified project controls professional with 14+ years of project and construction management experience. Looking for an opportunity to drive project success by using the skills acquired in the Oil & Gas and Electrical Utility industries. Have led efforts in:

- Cost analysis and forecasting
- Schedule creation, maintenance, and analysis
- Earned Value Management analysis
- Risk management and analysis

Adept at working with limited direction in stressful environments to solve project needs and create cohesive team environments.

Employment History

NextDecade, LLC. January 2019 - Present

Sr. Project Planner/Scheduler, RGLNG Project, Houston, TX

- Develop master integrated schedule (MIS), including all owner and contractor activities needed prior to introduction of gas to the \$13 Billion facility. Create Basis of Schedule and develop level 1 schedules, summarizing the 13,000 scheduled activities, for management review and reporting.
- Interface with engineering, construction, regulatory, procurement, and other disciplines to verify activity status, update Primavera schedule, and provide analysis to project team.
- Identify project completion risks and assist in the identification of appropriate mitigation actions. Run Monte Carlo simulation, using Acumen Fuse, on the MIS
- Participate in EPC contract review and analysis during negotiation stage.
- Conduct and lead project schedule baseline analysis on contractor schedules.
- Monitor contractor schedules (including the EPC, dredging, water and sewer, and pipeline contractors) to identify schedule variances to ensure schedule adherence and compliance.
- Participate in hiring process of additional planners/schedulers.

EASi, LLC.

August 2017 - December 2019

Project Controls Analyst III, Gahanna, OH

- Developed, maintained, and analyzed project schedules using Primavera P6 for transmission and distribution projects for AEP (approximately 30 project schedules at a time) by defining activities, duration and relationship logic to implement project plan to represent key decisions and deliverables which took place during project execution.
- Interfaced with engineering, construction, planning, project management, regulatory, right of way, and other transmission partners to verify updated Primavera schedule, resource, and cost information.
- Conducted and led project schedule baseline review meetings with team members and ensured timely approval of the baseline.
- Ran regular project team meetings.
- Mentored and trained less experienced Project Controls Analysts and Project Controllers.
- Assisted the new project manager to understand duties and responsibilities of his/her position.

ConocoPhillips**June 2009 - June 2017***Project Controls Specialist, APLNG Project, Gladstone, Queensland, Australia**August 2014 – June 2017*

- Member of APLNG Cost Performance team that won 2016 SPIRIT Award for cost tracking and forecasting on the \$11 Billion APLNG project.
- Facilitated the field generated risk mitigation and contingency planning process for the project. Coordinated with project management on monthly contingency management process and reported on contingency status.
- Evaluated, controlled, and input the cost impacts of changes or variations into project cost reports. Ensured proper review and approval of revisions to the project scope throughout project execution.
- Responsible for cost forecasting based on work in progress and earned value management (EVM).
- Lead the development of project control execution strategies at construction site.
- Provided inputs to the monthly project status report from construction field.

*Schedule & Risk Analyst, APLNG Project, Brisbane, Queensland, Australia**February 2012 – August 2014*

- Maintained project risk register to ensure accuracy in mitigation efforts on the 350+ active risks.
- Created a risk schedule, from the overall 12,000 activity schedule, in preparation for the Monte Carlo simulation to facilitate Schedule Risk Analysis (SRA).
- Ensured accurate schedule and risk updates for the monthly report.
- Solicited full input and commitment from project discipline leads on the desired timing, duration, and sequencing of primary permits and compliance activity.
- Provided input to the baseline master schedule networks (all requested levels) using Primavera P6 planning software.
- Created a software tool through Microsoft Access to move activity codes from one user to another.
- Forecasted key milestone dates, based on EVM and project historical performance.
- Worked closely with cost estimating / cost control functions, to ensure fully integrated project control services to PMT.

*Reporting Coordinator, APLNG Project, Houston, TX**July 2010 – February 2012*

- Developed the project monthly report and cost report formats used on the APLNG project.
- Served as the project specific SAP power-user, answering all SAP related questions for project team.
- Served as the primary party responsible for creating all requisitions for the project in SAP.
- Participated in identifying, implementing, and administering the project cost management tool (Skire).
- Assisted the Sr. Cost Analyst in developing monthly accrual and all other cost reporting functions.

*Project Controls Analyst, CORE & Consent Decree Projects, Wood River, IL**June 2009 – July 2010*

- Sole cost and schedule reporting responsibility on the WRR Consent Decree project (\$270 million budget).
- Tracked and reported on financial progress and weekly manpower used on the Consent Decree project and two units of the CORE Revamps & Restarts project (a portion of the \$3.6 billion CORE project).
- Prepared in SAP material and service requests for services and materials used on project and tracked any changes made to contracts.
- Coordinated cost and scheduled reporting for the Fall and Spring turnaround (project work).

Integrated Services Company (InServ)**March 2008 – June 2009***Project Controls Analyst, CORE & Consent Decree Projects, Wood River, IL*

- Sole cost and schedule reporting responsibility on the WRR Consent Decree project.
- Tracked and reported on financial progress and weekly manpower used on the Consent Decree project and two units of the CORE Revamps & Restarts project.

- Prepared material and service requests for services and materials used on the project and tracked any changes made to the contracts.

Universal Personnel

February 2006 – March 2008

Project Cost Analyst for ConocoPhillips, *Belle Chasse, LA*

- Managed preparation of PMT Cost Control Procedures for use on all capital projects at Alliance Refinery.
- Tracked and reported on financial status, weekly manpower, and cost expended on a \$150 million Wet Gas Scrubber (WGS) project.

Education

- 2005 - Bachelors of Science - Business Administration - Finance, Brigham Young University - Provo, UT.
- Certified as a Project Management Professional (certification #1366849) by PMI (Project Management Institute)
